EcoSmart

- for DVI-D in dongle format
- USB 2.0 transparent
- Sound embedded
- Full HD videos in real time
- Point to point or switching via OSD and Switching Manager
- Mouse glide & Switch
- powered by USB
- Zero space factor for much space in the server room with zero RU
- Upgrade: VGA

ECOSmart in CAT version for distances up to 150m/492ft and resolutions up to 1920 x 1200 @60 Hz.

ECOSmart is compatible with standard network components. In the KVM4Future Matrix Switching System up to 2000 endpoints or for point to point connections.

Power can be supplied via USB or an external power supply.

In-house developed USB technology allows great flexibility in connecting to USB HID devices, such as mice and keyboards, tablets, etc.

ECOSmart is like all kvm-tec extenders too fast for slow latencies - latency 0,47 ms. With the perfect in-house developed video compression a lossless video and audio transmission is possible.

Zero space
